

Completed Wikipedia and FineMath sweeps

28/28 training points + two shared controls · TPP 10 · same seven-component objective

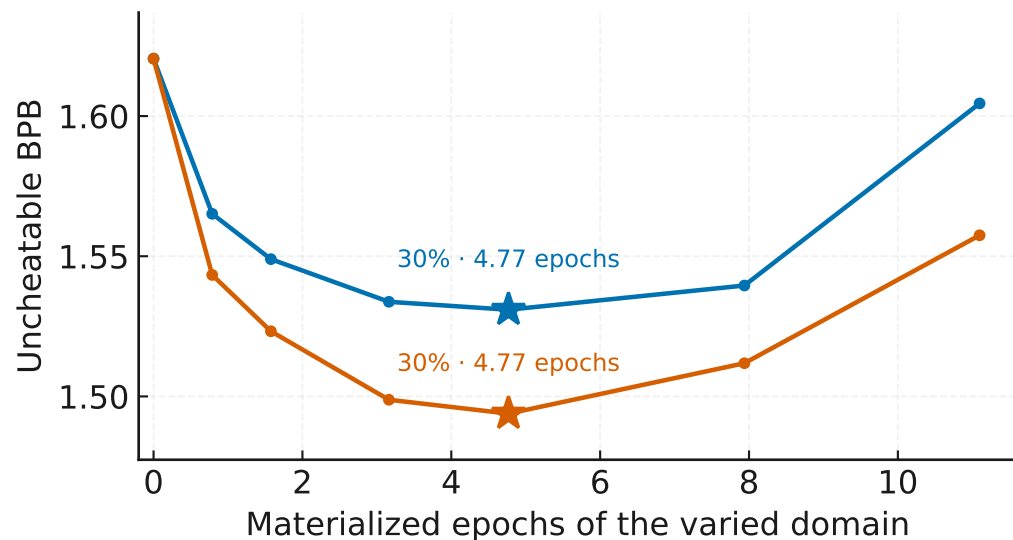

Epoch-matched proxy · 16.6M parameters

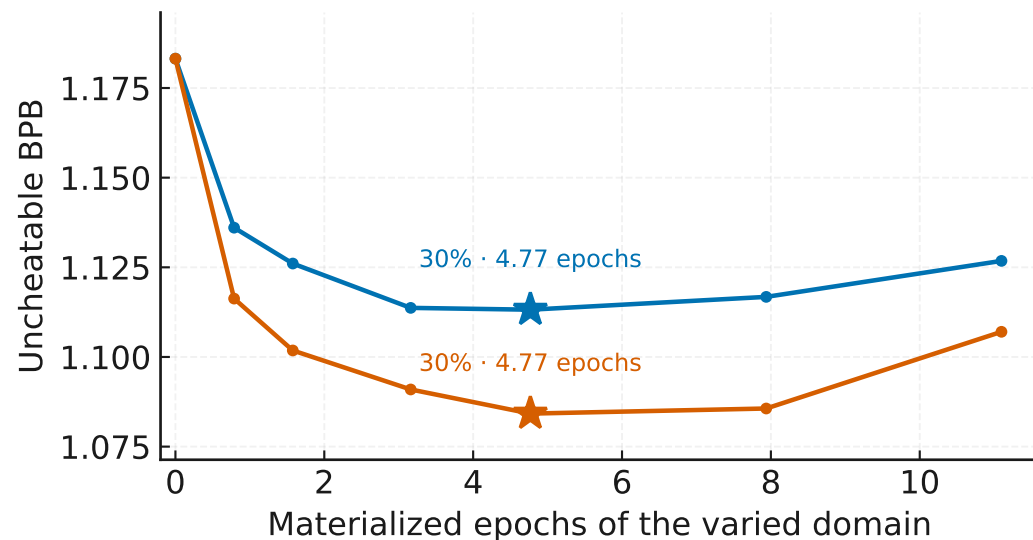

Target · 301.2M parameters

Valley detail · through 70% domain weight

Valley detail · through 70% domain weight

Stars: lowest observed loss. One seed; segments join measurements, with no fitted curve.
Corrected BPB: total scored loss bits / total scored bytes. All three saved-checkpoint audits passed.
